

Chapter 3

STEP 6

서비스 완성하기

STEP 6

서비스 완성하기

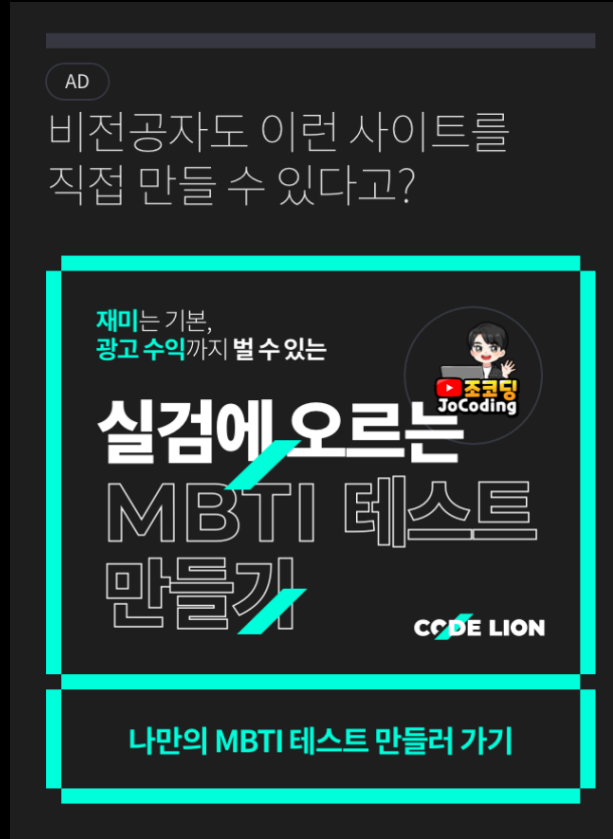

The screenshot shows the CODE LION IDE interface. On the left sidebar, the 'Step 6 서비스 완성하기' (Step 6 Service Completion) section is active. A red box highlights the '참고문서' (Reference) icon, with a red circle containing the number (1) next to it. The main editor area displays a Python file named 'codelion.py' with the following code:

```
1 from googletrans import Translator
2
3 translator = Translator()
4
5 # sentence = "안녕하세요 코드라이언입니다."
6 # sentence = input("언어를 감지할 문장을 입력해주세요 : ")
7 # detected = translator.detect(sentence)
```

A video tutorial overlay is displayed in the center of the editor. The overlay has a title bar that says 'STEP 4 번역하기 1' (STEP 4 Translation 1) and the CODE LION logo. The main content of the overlay lists four steps in Korean:

1. 번역기를 만든다
2. 번역을 원하는 문장을 설정한다
3. 번역을 원하는 언어를 설정한다
4. 번역한다

At the bottom of the IDE, there is a terminal window titled '강의 터미널' (Lecture Terminal) with the prompt 'CodeLion \$'. Below the terminal, a red box highlights the '첨부파일1' (Attachment 1) icon, with a red circle containing the number (2) next to it. The bottom status bar shows a play button, a volume icon, and the time '00:28 / 07:49'.
